

Crossroads

Crossroads is a mixed-use building located at one of Vancouver's busiest intersections. This project included the construction of a seven-level office tower, a six-level residential tower, 115,000 sqft of retail and commercial space, eight distinct town houses, and a 200,000 sqft underground parking facility.

Shurjoint Ring Joint products were used on this project's chilled, condensed, domestic, and heating water supply systems.
