

Telus Gardens

This \$750 million, one million sqft development in the heart of downtown Vancouver incorporates a LEED Platinum 24-story signature office tower, the first of its kind in Canada, a LEED Gold 53-story residential tower with more than 425 green homes, and retail space. By implementing innovative technologies and practices Telus Gardens saves at least 30% energy than a standard development of its size.

Shurjoint products (up to 24") were used on Telus Gardens' chilled, condensed, domestic, and heating water supply systems.
