

Granada Center

The Granada Center might be the largest mall in Riyadh, at a size of 460,000m2, and with a car park that holds 4500. Located on the outskirts of Riyadh, fairly close to the King Khaled International airport, it is an exquisite place to shop with everything that you'll need.

Shurjoint was specified for the Fire Protection and Chilled Water System. The grooved system's unique ability to accommodate the tight spaces and seismic movement made it the natural choice for this challenging project.
