

Seoul St. Mary's Hospital

Compared with other catholic medical centers around the globe, the size, facilities and infrastructure of Seoul St. Mary's Hospital are one of the best in the world. The hospital has a building size of twenty-two stories above ground, six below, 1,200 beds, and the total floor space of 190,000 square meters, is the largest hospital in Korea.

The Shurjoint ductile iron couplings & fittings were used on the HVAC, Chilled Water Piping System & Mechanical Pump Room. The engineer & contractor were satisfied with Shurjoint products quality and its grooved joining method which is very safe to install and does not require a heat torch or solder for installation.
