

Cambridge Hospital Domestic Water Softeners

Cambridge Memorial Hospital is located in Cambridge, Ontario which is part of a metropolitan area with a population of 400,000. The hospital is a 5-story building with A, B, and C blocks and was constructed at different spans. Shurjoint copper fittings in sizes 2" ~ 6" were specified for domestic water piping for water softeners as they are UL classified as per NSF/ANSI 61 and the grooved design are easily to install without heat and are easy to retrofit and maintain.
