

Delmon Office Building

The Delmon Office Building is located at Al Khobar, K.S.A. The Project Designers approved Shurjoint Ductile Iron Fittings for the Chilled Water System because of the Quality and Ease of Piping System Maintenance as well as the grooved system's unique ability to accommodate the tight spaces like the Pump room. In addition, the size range of Shurjoint products are quite comprehensive which is also a factor why they are selected by the Designer.
