

Etisalat Tower 2

One of the world's most distinctive skyscrapers, the Etisalat Tower 2 is topped by a large sphere for which many people like it, as it looks like a "Giant Golf Ball". The Etisalat Tower 2 is a 33-floor tower in Dubai, United Arab Emirates, and has a total structural height of 185 m (607 ft).

Shurjoint Model SS-8 stainless steel couplings made in austenitic grade CF8M (316) and CF8 (304) were selected and specified in the potable water line because the engineers wanted a system that could handle pressures above 20 bars and resistance to corrosion.
