

Hyundai-LG EV battery plant

Located in West Javan town of Karawang New Industry City, this joint venture between Hyundai Motor Group and LG Energy Solution is the first automotive battery plant in Indonesia and can produce up to 10 GWh of battery cells every year, enough to power 150,000 EVs.

Indonesia's burgeoning electric vehicle industry reached a significant milestone with this establishment of a state-of-the-art battery manufacturing plant. The facility, strategically developed to support Hyundai and Kia EV production, focuses on sustainable battery technology to meet growing global demands. Integral to ensuring the safety and reliability of this advanced manufacturing site, VSH Shurjoint's innovative DI grooved piping products (DN65 to DN300) for fire protection and HVAC were selected to safeguard critical infrastructure and maintain optimal environmental conditions. VSH Shurjoint's grooved piping solutions are renowned for reliability and ease of installation, making them an ideal choice for industrial applications.
